

Is Roti, Kapda Aur Makaan Enough For Our Society...? No, We Require Basic Health & Education Too

Most Of Us Have Philanthropic Side Of Ours That Always Remains Hidden/Suppressed Due To External Pressures Of Work & Family.

We Do Not Realise That A Small Step From Our Side Can Create Values To People In Such A Big Way That They Can Look Up To Themselves To Take A Big Leap For Their Lives..

Please See The Following 2 Instances As Examples:

1. Basic Local Healthcare: If Someone Gets Basic Health Solutions Free Of Cost At The Beginning Of Any Ailment, There Are 99% Chances Of Survival Of The Person. But, There Is More To It, It Reduces The Burden On Regional /State/National Hospitals & They Can Treat "Critical Cases" With Much More Efficiency, Resulting In More People Surviving Due To Better Attention & Timely Treatment.

2. Basic Local Education: One Of The Biggest Problems For Illogical Mindset Is Lack Of Education And Not Only That, Education Helps In Understanding & Implementation On Things That Are Required For The Society At Large Level Too. This Can Start Only With Basic Education Given To All Once They Reach A Specific Age And That In Turn Would Help Them Decide Which Way One Can Contribute To The Society.

It Is Always Better To Leave All The Above Things Like Roti, Kapda, Makaan, Basic Health & Basic Education To The Government, But Political Will Often Tries To Direct People /Policies For Their Own Benefits Leading To Only Some Sections To Get Benefits From These Things.

It Requires More Public Initiative To Ensure We Have Local Facility Centers Which Give People Food, Shelter, Basic Wearable, Basic Education & Basic Healthcare So That They Live Their Lives Without Any Deprivation.

People Can Do Shramdaan (Work Towards Repayments In Those Centers Itself Without Any Bias) & Help Giving Back The Community There & Then While Carrying Out With Things Mentioned Above. This Can Even Be Done Without Any Monetary Transactions Within Those People While The

Society Outside Can Contribute At Their Will To Keep These Centers Running Smoothly.

We Are Planning To See These Kind Of Centers Being Opened At Every 3-5km Radius All Over The Country And Reach Out To Maximum People So That The Entire Burden Of The 5 Things Is Totally Owned By The Society Itself.

We Would Like To See How Many People Respond To This & Contribute From Their Side By Replying So That We Can Get In Touch With Them
